- Highlights the need to maintain reliable online payments and review customer demand for other payment options.

Top 10 Products by Sales

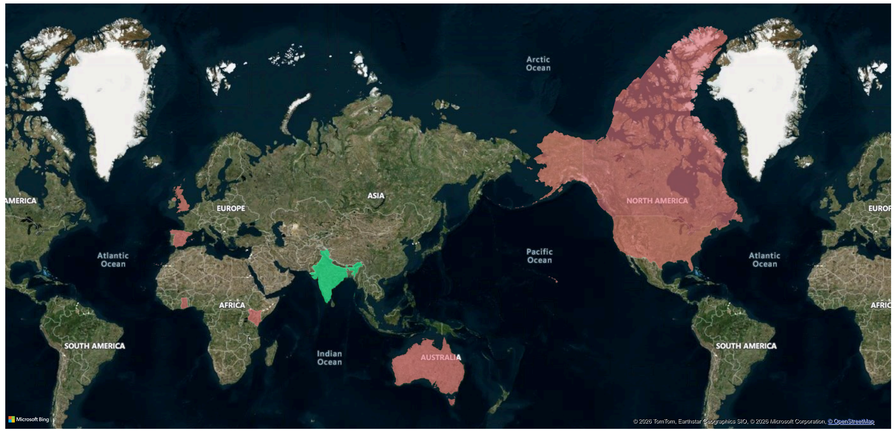

- Identifies the 10 best-selling products by quantity.
- Helps understand which products are most popular among customers.
- Supports inventory planning and promotional decisions.

PADANJALY GEOGRAPHICAL SALES PERFORMANCE DASHBOARD

Total Cities	Total States	Total Countries	Top Country Sales
269	73	24	₹ 1.35M

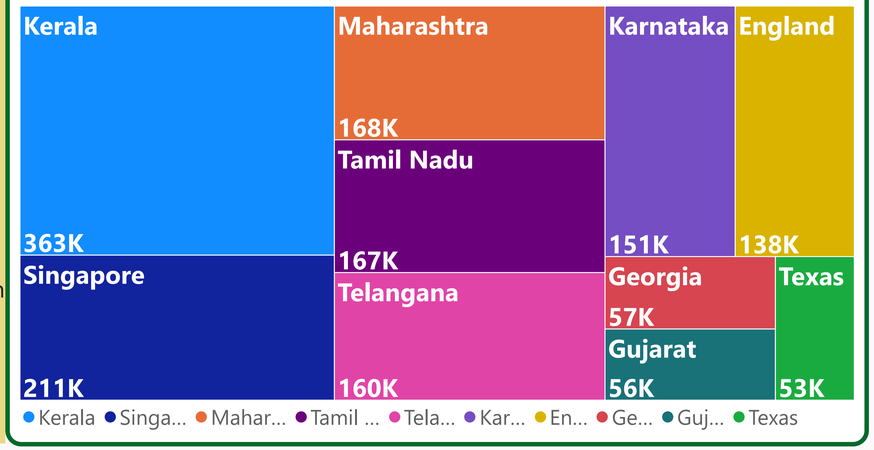

Sales by Country

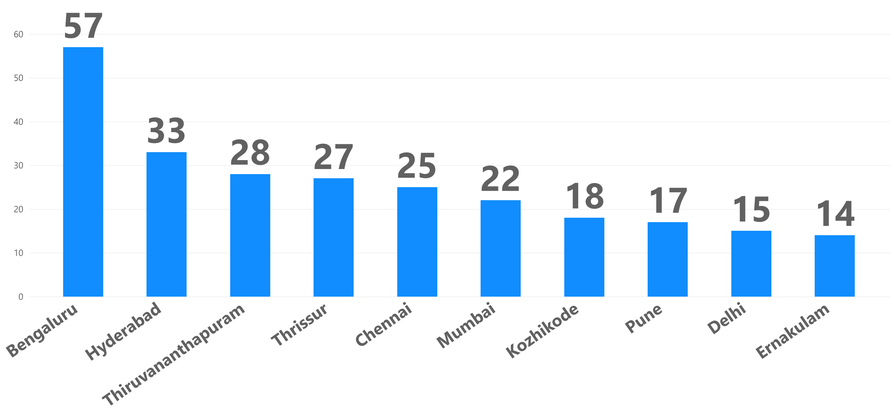

- Sales come from a small set of countries, and India is the main one. The Top Country Sales card shows ₹1.35M for the leading country, out of 24 countries in total.
- The US, UK, Australia and Singapore also have sales, so the overseas business is spread across several markets. Those markets could be grown with targeted campaigns.

- Kerala leads with ₹363K, but Singapore comes second with ₹211K from only 4 orders. That is about ₹53K per order, against roughly ₹1.5K per order in Kerala.
- England (₹138K), Georgia (₹57K) and Texas (₹53K) also make the top 10 with only a handful of orders each. A few large overseas orders are worth more than many small local ones, so international bulk or high-value orders deserve attention.

Top 10 States by Sales

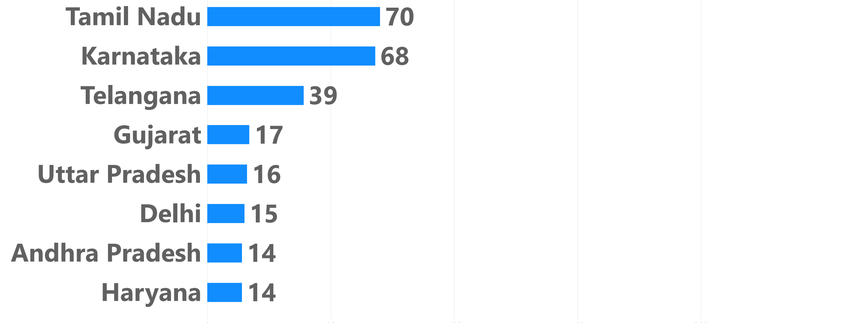

Top 10 Cities by Orders

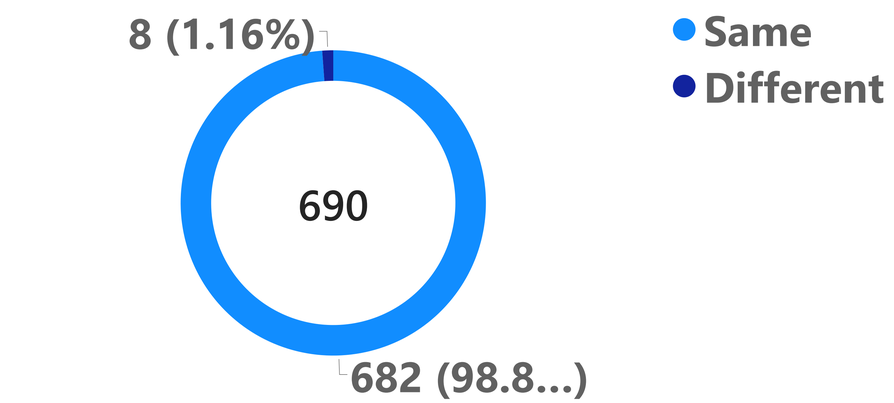

- Bengaluru leads with 57 orders, followed by Hyderabad (33), Thiruvananthapuram (28) and Thrissur (27). Metro cities and Kerala towns drive most of the order volume.
- Order counts drop quickly after the top few cities, from 57 to 14 across the top 10. Cities such as Pune, Delhi and Ernakulam, with 14 to 17 orders each, are good targets for delivery and marketing improvements.

- Kerala has 235 orders, more than three times the next state (Maharashtra, 73), so the business depends heavily on one state.
- Maharashtra (73), Tamil Nadu (70) and Karnataka (68) form a close second tier. States from Gujarat down (17 to 14 orders) are far behind, which is the largest growth gap.

Top 10 States by Orders

Billing City vs Shipping City

- 98.84% of orders (682 out of 690) were shipped to the same city as the billing address, while only 1.16% (8 orders) were shipped to different cities, indicating a strong alignment between billing and shipping locations.

- Domestic orders account for 88.3% (609 orders), while international orders represent 11.7% (81 orders). Despite their lower volume, international orders contribute 46.5% of the total order value, with an average order value of ₹14,488 compared to ₹2,218 for domestic orders, highlighting the significant revenue potential of international markets.

India vs International by Order
